

Remote control devices for tractor/trailer inspections

T03 – TRAILteck The full version

The T03 represents the most complete unit in the TRAILteck family.

Cabinet style with wheels, designed to hold a standard 12 Volt battery (groups 24, 27, 31), this unit is designed for use in a service shop and can also be utilized as a portable yard unit. A built-in power converter / charger allows the machine to be operated with or without a battery.

T03-B
TRAILteck Basic

- Standard air & electrical functions only

T03-S
TRAILteck Standard

- Standard air & electrical functions
- Front lights
- Circuits analyser

T03-P
TRAILteck Premium

- Standard air & electrical functions
- Front lights
- Circuits analyser
- Truck verification
- ABS ISO plug

TC02 – TRAILteck Compact The economic version

The TC02 has virtually all the same functions as model T03. Primarily designed for use in mobile service units or as a dedicated unit in trailer inspection bays.

TC02-B
TRAILteck Compact Basic

- Standard air & electrical functions only

TC02-S
TRAILteck Compact Standard

- Standard air & electrical functions
- Circuits analyser
